## Demystifying the European Union

MAJOR  
NEW TEXT

### The Enduring Logic of Regional Integration

Roy H. Ginsberg

*"Ginsberg has produced a terrific piece of work to mark the fiftieth anniversary of the Treaty of Rome... This book really DOES demystify the EU for the interested beginner, while even the most grizzled veteran will learn things they didn't know."*

*If there is another book on the EU that is this much fun to read, I've not yet found it."*—  
**John Peterson, University of Edinburgh**

The European Union is now fifty years old. However, it remains a mystery to many people in and outside Europe. This clear and comprehensive book is dedicated to "demystifying" the EU for both introductory and seasoned students of European integration. Roy H. Ginsberg begins with the foundation blocks of history, law, economics, and politics to provide the context for understanding integration. He then deconstructs the EU into its individual elements to examine them in relation to one another and to the whole before reconstructing the EU as a single polity. In doing so, he evaluates the EU's scope for agency and its effects on Europeans and non-Europeans alike. Emphasizing this wider perspective, Ginsberg convincingly demonstrates that the EU is a wellspring of support for conflict prevention and resolution throughout the world.

EDITOR: RONALD TIERSKY

Europe Today

A Twenty-first Century Introduction

Edited by Ronald Tiersky and Erik Jones

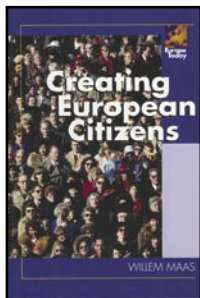

This clearly written and comprehensive book, a true twenty-first-century enterprise, is the only work that offers a sustained and unified set of both country case studies and analysis of the European Union. The contributors explore the new Europe—West and East—using intertwining themes of domestic politics, European integration, and European security. Each chapter provides a foundation of basic political

information and explanation, enhanced by distinctive and informed perspectives on current issues.

With its strong international emphasis and focus on Europe before and after Iraq, this book will lead readers toward a coherent view of intra-European conflicts, Europe and the United States, and Europe's international responsibilities.

Creating European Citizens

Willem Maas

Exploring a key aspect of European integration, this book considers the remarkable experiment with common rights and citizenship in the EU. Explaining this innovation—why states cede their sovereignty and eradicate or redefine the boundaries of the political community by including “foreigners”—Willem Maas analyzes the development of European citizenship within the larger context of the evolution of rights. Imagining more than simply a free trade market, the

goal of building a “broader and deeper community among peoples” with a “destiny henceforward shared—creating European citizens—has informed European integration since its origins. The author argues that its success or failure will not only determine the future of Europe but will also provide lessons for political integration elsewhere.

Scandinavia in World Politics

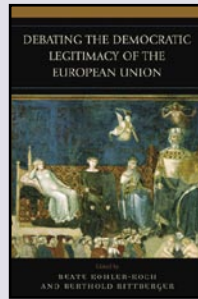

Christine Ingebritsen

This book offers a sustained appraisal of Scandinavia's foreign policy and role in the global economy in the post-Cold War period. Ingebritsen argues that Scandinavia has both the legitimacy and the domestic political attributes to be an important international player. She examines how social innovators such as Sweden and Finland seek to influence European integration and how Norway has cultivated a unique niche in its foreign relations. Scandinavia, she convincingly shows,

has become a “norm entrepreneur,” exercising its influence abroad through moral leadership—from sponsoring the Nobel Prize and participating in global peacekeeping efforts to providing generous foreign aid and monitoring human rights abuses in the international community. Demonstrating how Scandinavia has made its model of the good society viable on a global scale, this text offers a fascinating case of small-state success and individuality in an increasingly globalized world.

GOVERNANCE IN EUROPE SERIES

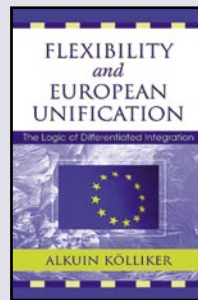

Debating the Democratic Legitimacy of the European Union

Edited by Beate Kohler-Koch and Berthold Rittberger

The discussion about a constitution for the European Union and its rejection by referendum in two of the EU founding member states has once again spurred public and scholarly interest in the democratic quality

and potential of the European Union. This book brings together distinguished thinkers from law, political science, sociology, and political philosophy to explore the potential for democratically legitimate governance in the European Union. This volume is the first of its kind to overcome the present state of fragmentation in the debate about the conditions and possible remedies for what is often called the “democratic deficit” of the European Union.

Flexibility and European Unification

The Logic of Differentiated Integration

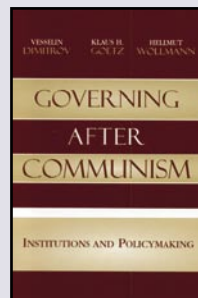

Alkuin Kölliker

“The tradeoff between widening and deepening is a core problem of European integration. As we have learned from the referendum debacles, the EU can only address this challenge through flexibility. Alkuin Kölliker's analysis of the centripetal and centrifugal forces in the unification process is the first rigorous and timely examination of this

key issue.” - **Gerald Schneider, University of Konstanz**

This book disentangles the important, fascinating, and complex relationship between flexibility and European unification.

Governing After Communism

Institutions and Policymaking  
Vesselin Dimitrov, Klaus H. Goetz, and Hellmut Wollmann

“A landmark text in the study of the new post-communist political systems in post Cold War Europe...required reading for all who wish to understand an essential aspect of how the new Europe functions.” – **Kenneth Dyson, Cardiff University.**

This timely comparative analysis explores the evolution of governance in Central and Eastern Europe. The book considers post-communist leaders' key challenge: the development of central government institutions capable of coordinating, integrating, and steering the policymaking process.

**Economic Efficiency, Democratic Empowerment** NEW

**Contested Modernization in Britain and Germany**

Edited by Ingolfur Blühdorn and Uwe Jun

Germany and Britain are two major European economies that have been trying to confront the challenges of globalization in very different ways. Britain has favoured market liberal strategies; Germany has endeavoured to retain its tradition of consensualism and the strong welfare state. Focusing on the period since 1997/8, this book explores the controversies and struggles surrounding the agendas of social, economic, and political modernisation in the two countries.

This book focuses on the tensions between two key parameters in contemporary modernisation discourses: economic efficiency and democratic renewal. Can these two goals be achieved at the same time? What exactly does the highly contested term efficiency imply and what is its relationship towards the equally ambiguous goal of democratic renewal?

**Resolving the Crises in the European Community/European Union**

Sam-Sang Jo

The history of the European Community/European Union's (EC/EU) development is a narrative of crises generated and resolved. To date, the resolution of crises in community affairs has furthered European integration. This book contends that European myths, which emerged from Europe's cataclysmic experiences in World War I and II, cement the member states within the EC/EU, and lead to greater social, economic, and political integration with the EC/EU.

**The Masters of Europe's Money**

Karl Kaltenthaler

Drawing on numerous interviews with high-ranking and founding members of the European Central Bank (ECB), Kaltenthaler identifies and explains the factors that shape the bank's domestic and international monetary strategies. To secure the long-term needs of the European economy, the decision makers in the ECB have created a model that attempts to replicate the German Bundesbank's success at the European level to lend credibility to their own policies.

**Local Politics: A Resource for Democracy in Western Europe:** NEW

**Local Autonomy, Local Integrative Capacity, and Citizens' Attitudes toward Politics**

Angelika Vetter

*Local Politics: A Resource for Democracy in Western Europe* examines the relationship between local institutional design and citizens' attitudes toward democracy. As the last stage in the nation-state administrative apparatus, local authorities represent the synapse between the political-administrative system and the citizens. By comparing attitudes towards local and national politics in a cross-national framework, this book investigates the socialization functions of local politics.

Burak Akçapar

Diplomat Burak Akçapar suggests a strategic framework for thinking about the foreign and security policy of Turkey, Europe, and the United States. If Turkey joins the EU, this multiregional actor will help connect various strategic basins and cultures, generate a credible pull factor for benign change in its neighbourhood, assist Europe in its aspirations to become a global actor, and fulfil the United States' quest to find a credible transatlantic partner.

Everyone who is interested in peaceful relations between East and West should read this book to better understand Turkey's bid for EU membership.

Katherine A. R. Opello

Having been unsuccessful at implementing quotas for female candidates—unlike several of their European neighbours—France passed a gender parity law in 2000 that required all political parties to field an equal number of male and female candidates. This book considers this transition from quotas to parity, providing a history of French women's rights and the French electoral process.

### Promoting Unity, Preserving Diversity?

Member-State Institutions and European Integration

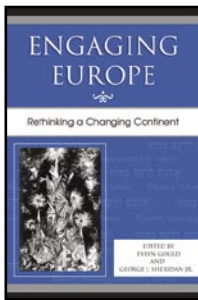

Andrea M. Gates

As the European Union continues to evolve and as European integration proceeds, it has become increasingly difficult to meet two goals fundamental to the EU: promoting European unity while preserving member state diversity. To highlight this tension, *Promoting Unity, Preserving Diversity?* examines the ways in which six of the member

state parliaments are connected, via particular legislative bodies called European Affairs Committees to the EU legislative process.

### Engaging Europe

Rethinking a Changing Continent

Edited by Evlyn Gould and George J. Sheridan, Jr.

What and where and who is Europe? This unique collection contends that Europe cannot be defined as simply a particular geographic location or a group of citizens who inhabit the same place and share a culture. Instead, Europe is a question to be answered by the teachers and students who study it. A collaborative and multidisciplinary collection, *Engaging Europe* explores Europe through history, literature, philosophy, music, and ethical narratives. A set of

imaginative contributors investigates European identity through a variety of cases, including Greece and Rome, the Bible, the Enlightenment, and the Shoah. Scholars of literature, history, and classics, as well as a composer, grapple with students' doubts about Europe's future relevance.

### The Politics of Greed

How Privatization Structured Politics in Central and Eastern Europe

Andrew Harrison Schwartz Prologue by John Zysman

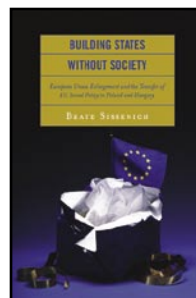

Foreword by David Ellerman

With the dissolution of the Soviet Empire economic reformers in the former Eastern Bloc rushed to liberalize and transfer state assets to private hands. They assumed that private owners in a market setting would have no choice but to behave rationally—that is, to invest in

restructuring privatized enterprises so as to maximize profits. *The Politics of Greed* applies ownership regime theory to a broad range of post-communist privatization cases to shed light on this important issue.

Beate Sissenich

Focusing on the 2004 enlargement of the European Union, *Building States without Society* highlights the real limits of cross-national rule transfer even when power is uneven between rule-makers and rule-takers. Tracing the role of labour and other non-state actors in transferring rules,

Howard J. Wiarda

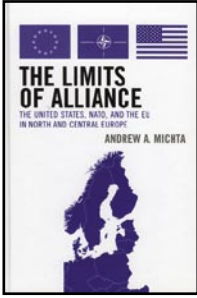

This book tackles the important question of development in Southern and Eastern Europe. Both areas have undergone impressive transitions to democracy, experienced vast social changes, embraced open markets, developed

## The Limits of Alliance

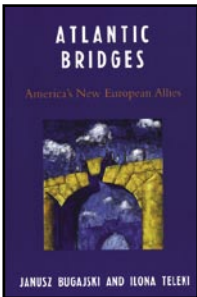

The United States, NATO, and the EU in North and Central Europe

Andrew A. Michta

This book asks if the relationships that the United States forged with North and Central Europe during the Cold War still viable today? As the North Atlantic Treaty Organization (NATO) declines and the European Security and Defense Policy (ESDP) emerges, can the United States and Europe bridge the transatlantic fissures that opened when the U.S. prepared to go to war with Iraq?

*The Limits of Alliance* argues that, although NATO will continue to exist in the coming decade, the hollowing-out of the alliance will be accompanied by a shift in transatlantic security relations toward bilateralism determined by regional security considerations.

## Atlantic Bridges

America's New European Allies

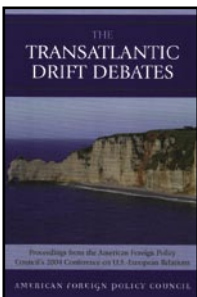

Janusz Bugajski and Ilona Teleki

Conflicting strategies for containing and combating security risks have strained relations between the United States and the European Union despite common goals. The central and eastern European (CEE) countries have generally exhibited a more pro-U.S. approach than many of their western European neighbours. This book argues that U.S. must resist the temptation to focus its diplomatic efforts on bilateral agreements with those European countries in closest alignment to it, and instead use

these dependable and durable partners among the CEE states to develop more predictable and productive relations with the EU.

### Coming of Age

German Foreign Policy since 1945

Helga Haftendorn

The author's overview of past half-century shows a high degree of continuity and consistency in German foreign policy despite the tumultuous events of the era. However, Haftendorn argues that Germany's traditional policy of self-restraint was increasingly counterbalanced by a more assertive stance after reunification and the rise of a post-war generation to power. Although the country's leaders continued to value international institutions, the benefits were increasingly weighed against Germany's enlightened self-interest.

European Union, which has elevated the EU—and its member countries—to near superpower status. What are the implications of this development for the United States? Ambassador Rockwell A. Schnabel and Francis X. Rocca take up this critical and complex question in a detailed, firsthand analysis of the EU institutions, their leadership, and the member countries.

### Relocating Global Cities

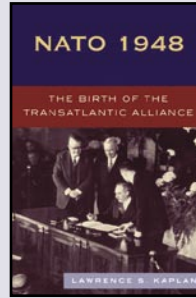

From the Center to the Margins

Edited by M. Mark Amen, Kevin Archer, and M. Martin Bosman

This volume proposes an alternate theoretical approach to the literature of globalization while remaining grounded in concrete discussions of key cities, including Frankfurt and Brussels. Reconciling a market-based understanding and an agency-based understanding of global cities, this book proposes that globalization and cities are mutually constituted by the global political economy engaging with transnational and local agents.

### Nation States

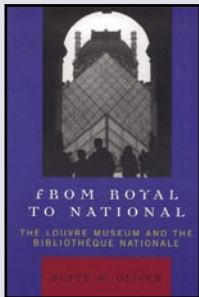

The Cultures of Irish Nationalism

By Michael Mays

Drawing on diverse cultural forms, and ranging across disciplinary boundaries, *Nation States* maps the contested cultural terrain of Irish nationalism from the Act of Union of 1800 to the present. In looking at Irish nationalism as a site of struggle, Mays examines both the myriad ways in which the nation fashions itself as the *a priori* ground of identity, and those processes through which nationalism engenders an ostensibly unique national identity corresponding to one and only one nation-state, the place where we always have been, and can only ever be, "at home."
