

NEW!

Do YOU know what the world's leading scientists are working on right now?

Shrodinger's Rabbits **Entering the Many Worlds of Quantum** **Colin Bruce**

Oxford-based Colin Bruce explores the cutting-edge work being done in quantum physics, in language that general readers can grasp. He explains which scientists have come up with which theories, and what the practical applications of this mind-boggling branch of science are.

£15.95 hardback
ISBN: 0-309-09051-2 October 2004

Mendel in the Kitchen **A Scientist's View of Genetically Modified Food** **Nina Federoff & Nancy Brown**

Written by a world-leading molecular biologist and a science writer, this book argues that genetic engineering can help us become better stewards of the Earth. Get informed on the scientific facts on GM food, and make up your own mind on this hotly-debated issue.

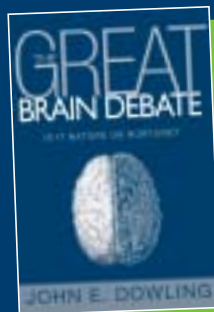

£17.95 hardback
ISBN: 0-309-09205-1 October 2004

The Proteus Effect **Stem Cells and Their Promise for Medicine** **Ann B Parsons**

Learn what stem cells are, and why they could be the answer to Alzheimer's, Parkinson's and leukaemia, guided by jargon-free journalist Ann B Parsons. This book shows us how the controversial stem cells were discovered, and what they can do for medicine.

£15.95 hardback
ISBN: 0-309-08988-3 October 2004

The Great Brain Debate **Is it Nature or Nurture?** **John E Dowling**

Dowling is a professor at Harvard University, and here he shares his expertise with non-scientists in a readable exploration of the human brain. In particular, he shows how the brain changes throughout our lifetime, both naturally and under external influences, pointing the way to a better medical and social understanding of challenging behaviour, mental illness and old age.

£15.95 hardback
