

A CENTURY OF INNOVATION

THE ENGINEERING THAT TRANSFORMED OUR LIVES

George Constable & Bob Somerville

Foreword by Neil Armstrong, Afterword by Arthur C Clarke and including a contribution by Bill Gates.

£29.00
Hardback
256 glossy large-format pages

“This book will remind you of the breadth, the depth and the importance of engineering to human existence.” - Neil Armstrong.

What has engineering done for you? Discover just how far and fast we've come over the last 100 years with the stunning book **A Century of Innovation: The Engineering That Transformed Our Lives.**

Contents: The Top 20 Engineering Achievements of the Twentieth Century

- Electrification • Automobiles • Aeroplanes
- Water Supply and Distribution
- Electronics • Radio and Television
- Agricultural Mechanization
- Computers • Telephone
- Air Conditioning and Refrigeration
- Highways • Spacecraft • The Internet
- Imaging • Household Appliances
- Health Technologies
- Petroleum and Petrochemical Technologies
- Laser and Fibre Optics
- Nuclear Technologies
- High-Performance Materials

Beautifully produced with lavish colour photography, this attractive book celebrates humankind's most important engineering achievements. Like no era ever before, the twentieth century brought incredible changes to standards of living and knowledge in little more than one human lifetime.

Could you now live without electricity? Or your phone? What if cars, computers or lasers had never been invented? Each of the top twenty achievements is explored in an individual chapter, including a full history and a look at its impact on the world, plus a perspective from the world's top authorities in each field.

Join us as we mark the new millennium with a fascinating exploration of our species' ingenuity and determination in **A Century of Innovation.**
